

ASHAR FAZAIL

Senior Full-Stack Developer (Web & Automation)

A: DHA Phase 9, Lahore **P:** +92 308 1506142 **E:** syedashardev@gmail.com **L:** /in/syedasharfazail **W:** https://afashah.com

Professional Summary:

Senior Full-Stack Dev with 7 years in web architecture and a solid year focused on AI automation. I've got the Python, system-building, and LLM skills needed to actually make workflows faster. I'm looking for a role where I can use my experience and team-first attitude to help the company hit some big goals.

Technical Toolbox:

- Full-Stack (PHP & React)
- AI Automation & Python
- API Integration
- Technical Team Leadership
- Speed & Performance Optimization
- Workflow Optimization

WORK EXPERIENCE:

Manager, World Wide Web - Remote

June 2025 - Present

Agent Haq, Canada

- **Directed the tech for high-traffic global platforms** across 20+ international markets, ensuring everything stayed fast and stable during massive event launches.
- **Built a Python-based automation system** to handle real-time data monitoring and inventory shifts, replacing manual updates for high-stakes international tours.
- **Deployed AI-driven notification pipelines** to automatically send personalized, real-time updates to thousands of global users, cutting out manual work entirely.
- **Led a small, cross-functional team** to hit tight deadlines for international tour launches, handling everything from project roadmaps to mentoring junior devs on our automation stack.
- **Key Achievement: Global Tour Systems**
 - Built the digital backbone for world tours of artists like **Faisal Kapadia** and **Asim Azhar**, making sure the systems stayed stable for thousands of fans across 20+ cities even during massive traffic spikes.

Senior UX Web Developer - Remote

May 2022 - April 2026

Baeldung, Romania

- **Built the entire multisite system from scratch**, which now supports millions of monthly visitors and serves as the backbone for their Java training platform.
- **Created a smart recommendation system** that follows user activity to suggest the best courses, which significantly increased sales and ad revenue.
- **Handled all the custom theme and plugin work** to make sure the site stayed lightning-fast even with massive traffic and heavy AdSense integration.
- **AI tools like Gemini and Claude** in my final year to speed up our dev work, acting as the lead to supervise and refine the code they generated for the system.

- **Key Achievement: High-Traffic Sales Growth**

- Took the site from a basic setup to a massive, revenue-generating platform that turns millions of readers into course buyers through the automated systems I put in place.

EDUCATION:

Bachelor's Degree in Information Technology

November 2014 - Nov 2018

University of Gujrat, Lahore, PK

TOOLS AND TECHNOLOGIES:

Automation & AI: n8n, LangChain, Ollama, and Gemini.
